

Please do NOT lift restrictions on media ownership on June 2. The FCC should enact MORE regulations to limit the extent to which one company can own multiple networks, stations, newspapers and means for delivering media. We need more regulation of this industry as technology develops and the potential for abuse increases, not less. Greater consolidation of ownership in the media industry will HURT the American public. The FCC should act in the interests of the American people and vote NOT to loosen regulation on June 2, and instead enact greater, more appropriate regulations to protect the American consumer from domination by media giants. Thank you.
